Mobile App Development Proposal: StudySwap

Project Name: StudySwap
Prepared For: San Sebastian
Prepared By: BeanJames V. Reyes
Date: February 11, 2026
Version: 1.0

---

1. Executive Summary

Many students struggle to find study partners, share notes, or get help with difficult subjects. Traditional study methods can feel isolating, and students often lack motivation when studying alone.

StudySwap is a mobile application designed to connect students who want to exchange knowledge, study together, and share learning resources. The app allows users to find study partners, swap notes, join subject-based groups, and earn rewards for active participation.

The goal is to increase student engagement, improve collaboration, and make studying more interactive and effective.

Expected Value:

- Increased student collaboration
- Improved academic performance
- Higher daily app engagement
- Potential monetization through premium features and partnerships

---

2. Project Overview

2.1 The Problem

- Students often study alone without support.

- Difficulty finding reliable notes or study partners.
- Lack of motivation and accountability.
- Existing study apps are limited to note storage or flashcards.

2.2 The Solution

Core Concept: A cross-platform mobile application that connects students for note sharing, study sessions, and academic collaboration.

Key Objective: To create a social learning platform where students can exchange knowledge, stay motivated, and improve their academic performance.

---

3. Scope of Work (SOW)

3.1 Target Platforms

- **iOS:** iOS 16+
- **Android:** Android 12+
- **Device Support:** Smartphones (tablet support in future updates)

3.2 User Roles

Guest/Unregistered User:

- View app features
- Browse public study groups
- Limited access to content

Registered User:

- Create profile

- Upload and share notes
- Join study groups
- Chat with study partners
- Earn points or rewards

Admin:

- Web-based admin panel
- Manage users and content
- Moderate reports and inappropriate content
- Manage rewards or features

3.3 Key Features List

Onboarding:

- Email, Google, or Apple login
- Profile setup (subjects, grade level)
- Introductory tutorial

Core Functionality:

- Note sharing and downloading
- Study partner matching
- Subject-based study groups
- In-app chat
- Study session scheduler

Gamification:

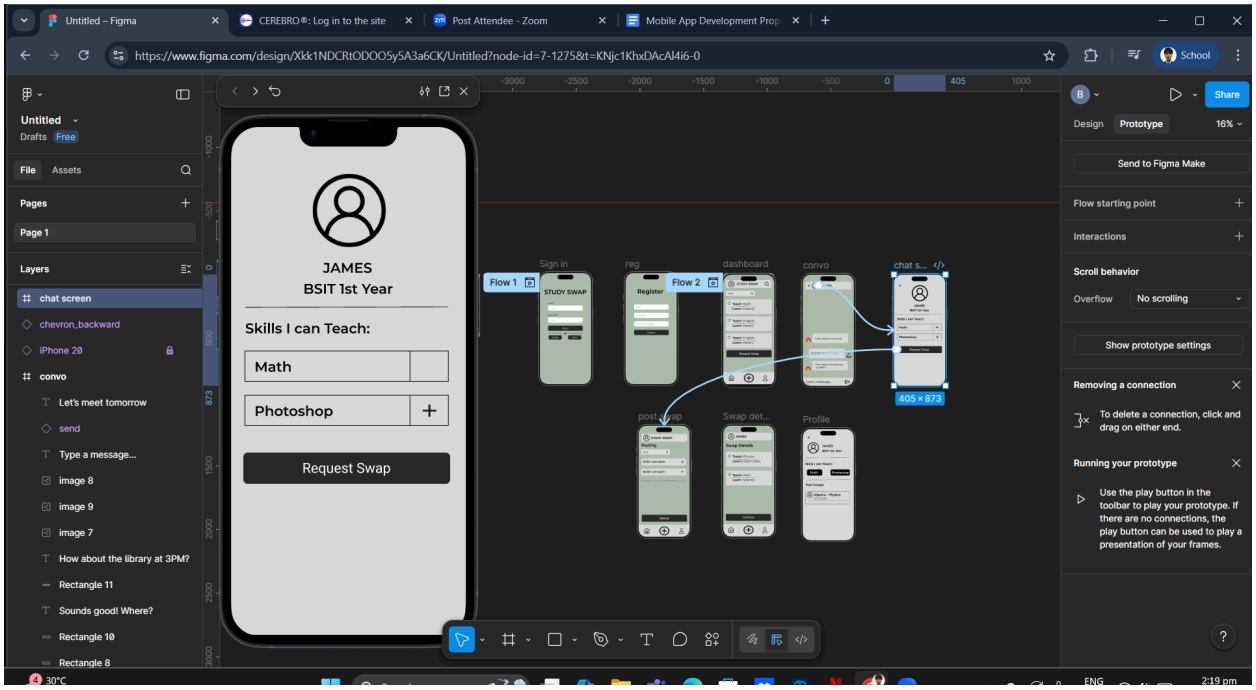
- Points for sharing notes or helping others
- Achievement badges
- Leaderboards

Notifications:

- Study session reminders
- New message alerts
- Group activity updates

---

4. UI/UX Design Strategy



---

5. Technical Approach

5.1 Tech Stack

Component	Technology Choice	Why we chose it
Front-End	Flutter	Single codebase for iOS & Android
Back-End	Firebase / Node.js	Real-time data and scalability
Database	Firestore	Flexible, real-time database
Cloud/Hosting	Google Cloud	Reliable and secure hosting

5.2 Security & Compliance

- SSL/TLS encrypted data
- Secure login with OAuth 2.0
- Role-based access control
- Content moderation tools

---

6. Project Roadmap & Timeline

Phase 1: Discovery & Strategy (Weeks 1–2)

- Requirement gathering
- Feature planning
- Competitor analysis

Phase 2: UI/UX Design (Weeks 3–5)

- Wireframes
- Prototypes
- Design approval

Phase 3: Development (Weeks 6–12)

- Sprint 1: Core architecture and authentication
- Sprint 2: Note sharing and chat features
- Sprint 3: Gamification and admin panel

Phase 4: Testing (Weeks 13–14)

- QA testing
- User Acceptance Testing

Phase 5: Deployment & Launch (Week 15)

- App Store submission
- Play Store submission

---

7. Commercials (Investment)

7.1 Cost Breakdown

Deliverable	Estimated Hours	Cost (PHP)
UI/UX Design	80	₱700–1,000/hr
Front-End Development	200	₱800–1,200/hr
Back-End Development	150	₱900–1,300/hr
QA & Testing	60	₱600–900/hr

7.2 Payment Schedule

- 30% upon signing

- 30% upon design approval
- 20% upon beta release
- 20% upon final launch

---

8. Maintenance & Support

- **Warranty Period:** 30 days of free bug fixing after launch
- **Optional Maintenance:** Monthly support for updates, monitoring, and minor improvements

---

9. Terms & Next Steps

- **Validity:** This proposal is valid for six (6) months.
- **Next Steps:** After approval, a kickoff meeting will be scheduled to begin Phase 1.
